

Can GMOs HELP PROTECT THE ENVIRONMENT?

THEY ALREADY DO.

Contrary to myths about GMOs hurting the environment, GMOs allow farmers to **preserve the land** while **doing more with less resources.**

The Environmental CHALLENGE:

20% POPULATION INCREASE BY 2050¹ =

HIGHER DEMAND FOR

FOOD

and **FIBER**

FUEL

2 POTENTIAL PATHS

1

Convert more land, like forests and prairies, into agricultural production

2

Use agricultural technologies like GMOs to increase crop yields on existing farmland

GMOS are ONE SOLUTION

In 2020, GMOs allowed farmers to use

57.8 MILLION less acres of land

to produce the same amount of food, fuel and fiber crops

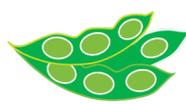

*That's more than the entire state of Idaho!*²

Without access to GMOs, farmers would have needed to plant an additional:

21 MILLION acres of corn

28.7 MILLION acres of soybeans

6.9 MILLION acres of cotton

1.2 MILLION acres of canola

to keep up with global production levels in 2020²
