

Are GMOs

SAFE?

YES. The National Academies of Sciences, Engineering, and Medicine 2016 report reaffirms

Over
900 studies and publications were examined

20+ scientists, researchers and agricultural and industry experts over a 2 year period reviewed animal studies, allergenicity testing, North American and European health data, and more

years of data since GMO crops were introduced

SAFE.

No substantiated evidence of a difference in risks to human health between current commercially available genetically engineered [GMO] crops and conventionally bred crops.
