

Open to Your Questions About How Our Food Is Grown

WE ANSWER **YOUR** QUESTIONS ABOUT GMOs

GMO Answers is committed to responding to questions about biotechnology. Our goal is to make information about GMOs and agriculture easier to access and understand.

Five Core Principles:

- 1 Respecting people around the world and their right to choose healthy food products that are best for themselves and their families
- 2 Welcoming and answering questions on all GMO topics
- 3 Making GMO information, research and data easy to access and evaluate and supporting safety testing of GM products; including allowing independent safety testing of our products through validated science-based methods
- 4 Supporting farmers as they work to grow crops using precious resources more efficiently, with less impact on the environment and producing safe, nutritious food and feed products
- 5 Respecting farmers' rights to choose the seeds that are best for their farms, businesses and communities and providing seed choices that include non-GM seeds based on market demand
