

Can GMOs HELP PROTECT THE ENVIRONMENT?

THEY ALREADY DO.

Contrary to myths about GMOs hurting the environment, GMOs allow farmers to preserve the land while doing more with less resources.

The Environmental CHALLENGE:

30% POPULATION INCREASE BY 2050¹ =

HIGHER DEMAND FOR

FOOD
and **FIBER**

FUEL

2 POTENTIAL PATHS

1

Convert more land, like forests and prairies, into agricultural production

2

Use agricultural technologies like GMOs to increase crop yields on existing farmland

GMOs are ONE SOLUTION

In 2015, GMOs allowed farmers to use

48.2 MILLION
less acres of land

to produce the same amount of food, fuel and fiber crops²

Without access to GMOs, farmers would have needed to plant an additional:

18.2 MILLION
acres of corn

20.7 MILLION
acres of soybeans

7.4 MILLION
acres of cotton

1.7 MILLION
acres of canola

to keep up with global production levels in 2015⁴
